## Experience

---

**RVN TV | NJ, Mount Laurel**

**Production Assistant | 08/2022 - 12/2022**

- Experience with camera operation; I had to know how to set them up and operate them.
- Operating the production board required communication with hosts, setting up lower thirds, running a show, and staying organized with the episodes after production.
- Detail-oriented with experience in set and sound management: Setting up the lights and making the set look good for filming was a big part of the job. Along the same lines, the audio had to sound nice and crisp. Everything must look and sound good.
